

Preparing for a nationwide well-organized strike against the long-term prison sentences for the imprisoned workers in Iran !

The savage islamic capitalist rulers have stated a widely brutal war against the working-class people in Iran , a war based on a brutality and ongoing barbaric suppression, torture and murder against any sign of workers-protest .This brutal and barbaric savagery of the bourgeoisie's war machine has widely uninterrupted attacked working-class movement during 40 years in Iran , and getting much more intense every day .With all the bloody cruel repression the islamic capitalist regime`s war against Iranian workers has strong comprehensively imposed a lot of hunger , misery and adversity , even lack of medication ,unpaid minor wages, cruelty and medieval beat against women based on gender discrimination , suppression with overwhelm of the most elementary mass protests against hunger and economic misery , drug addiction and prostitution to relieve hunger and even child-labor every day .One of the most barbaric political methods is usually home-raids of workers in midnight and also enforcement of arrest and torture which sometimes ends to a suspicious death or in the most cases in the following get convicted to a long-term prison sentence issued of the suppressive islamic courts of the islamic capitalist regime .

Seven of our fellow workers from " Haft Tapeh " who were demanding their unpaid minor wages have been sentenced each one of them into 18 years prison with whip , and in meanwhile the regime's warning the working-class movement by this . These workers crime according to the main-stream media is demand of unpaid low wages and other undeniable guild demands too , but the islamic capitalists state always define any demands of workers and any struggle for the required demands as allegedly acting against national security .

The islamic capitalist regime with the barbaric bloody brutality is just trying to save and keep the ongoing profitability cycle resulting from the horrible exploitation of the working-class and capital accumulation cycle in the wage-slavery system from any anti-capitalist radical risk .

The political-economic crisis plus the sanctions, bribery and also corruption in the state apparatus` political institutions has almost paralyzed the basis of the economy of the country .

By the way conflicts and political tensions with rivals and the bourgeois factions of the world is been putting the country's economic-political existence in danger .Despite all that ,the most important thing could be our radical anti-capitalist council based on 50 millions hungry working-class population who`re creating economic prosperity in the wage-slavery society , and the islamic capitalist regime knows the sheer truth very well .It`s mentioned that the islamic savage bourgeoisie is aware of that pure reality also that in the absence of a well-organized working-class council movement which could give more ability and opportunity ti the regime and the regime would handle its economic challenges at home and abroad too .

The capitalist ruling-class is aware of that reality that united well-organized workers with the rise of the class-consciousness among working-class are going to grow up and expend in the meantime , that's because we , all workers are the only invincible power of society in history and future-forward .

The regime's been using its whole systematic suppressive strength to prevent the rise of a strong well-organized anti-capitalist labor movement .

It`s worth mentioning that the islamic regime of ruling-class relying on its repressive forces and legislative elements to create an atmosphere of terror and strangulation in

society to prevent any rise and deepening of our class-struggle . The islamic bourgeoisie has also utilized a conceivable tactical tricks and deceit like a slight increase in wages of a small group of workers to create a divide among workers by seducing them to betray their brothers and sisters in labor-movement .

By paying a small portion of unpaid wages to some workers the regime has forced them to be silent and forced to avoid to show any solidarity with the rest of workers in the daily struggle .

The capitalist rulers know much better than any time that a shattering storm is on the way and it does mean our working-class campaign , the class uprising of the workers is on the way . The revolt of the hungry oppressed people is getting closer and no prison threat or torture of workers can stop it . Despite all repression and imprisonment of our fellow workers from " Haft Tapeh " and other workers , we shall declare that we have to get ready for a nationwide struggle and preparing for a national strike in Iran which by this means shut down all workplaces across the country .

We ask our brothers and sisters , all workers across the country to get ready for a nationwide campaign , so let's hold hands together and organize a nationwide strike

.  
We , all workers have to declare that we're going to strike and protesting the imprisonment of our fellow workers .

Let's declare that the last week of Dec. 2019 , the anniversary of the 2017`s uprising of hungry working-class people in Iran , we, workers are going to shut down the wheel of capitalism , value-added and the process of capital accumulation in all industries and work centers in Iran .

By this , we , the anti-capitalist workers ask our fellow workers around the world to show an anti-capitalist support and solidarity with your brothers and sisters in Iran .

Workers of the world , Unite !!!

A group of anti-capitalist workers of Iran
