

The Islamic regime of capital and the massacre of medical workers !

The devastating storm of the capitalist crisis, and the deadly Corona epidemic, born of capitalist relations with all its socio-economic impositions which has led to workers' lack of access to minimum health care facilities to counter the invasion of this deadly disease, which to this day has affected millions of working people and killed hundreds of thousands of working class people, all this is the result of capitalist domination over the lives of the whole working masses. In meanwhile, the situation of the working masses of Iran is more frightening and catastrophic than most parts of the world. Here in Iran, every protest by the workers is suppressed by the capitalist Islamic fascism and there are no facilities available for workers to protect their own lives from the danger of this deadly disease also. All workers, young and old, for their daily livelihood forced to sell labor-force, they're have no choice except hard working to provide daily living expenses even under the conditions of the Corona epidemic. In such a situation, the workers of the medical department, from the very beginning of the Corona invasion with a firm will and determination along with sacrifice their lives have rised and in the midst a wave of death, defending humanity and saving the lives of their working brothers and sisters. In contrast to the crimes of capitalism and the Islamic state of capital, many medical workers sacrificed their own lives to protect and save many lives. The actual number of casualties in the medical sector is much more than what we have here, but what has been recorded in our 28th

report to date, 864 medical workers are listed. (The names of all the medical workers, who lost their lives in defence of the right to life and against Corona, has been registered in the Against Capital publication) Collecting the name and details of the deceased workers of the Health Department under conditions and suffocation and repression of the Islamic regime of capitalism, hasn't been an easy task.

Also, news of medical workers' protests during the last days of Feb. 2022 until March 2022 is :

Feb. 24, 2022, gathering of medical science interns in Zanjan in protest of the low level of wages and also not receiving the salary of the previous months.

A group of medical staff and nurses from the private sector in Tabriz protested in front of the city governor office, against the non-payment of their salaries for 6 months.

March 05, 2022, the strike of doctors in deprived areas, in protest of the unknown employment situation, against low level of wages and hard working conditions.

March 08, 2022, physicians of Iran university of Medical Sciences in protest of the 11 month arrears of student scholarship and its low level.

March 13, 2022, medical training staff in protest of not receiving the allowance during the Corona.

Colleagues of Alireza Yazdi, one of the medical staff says so that today we're very sad. Because within two or three days of medical service in our section has been very hard and critical with very intensive and hard-working shifts Alireza Yazdi in his last shift said that he was in a bad condition and needed to

rest. But the authorities of the medical section didn't believe him and accused him of lying. Alireza Yazdi after completion of his shift went home but it didn't take long before his half-dead body was brought to the hospital. Unfortunately, he died this evening, it's a painful matter. He was only 27 years old and had two small kids.
